

QUICK FIXES

Here are some things to try. If you fix something, please write down how in the next section.

PROBLEM	The lights aren't turning on.
SOLUTION	<ul style="list-style-type: none">• Make sure you're not in cue 0. Go through a few cues to check.• Have you definitely turned the dimmers on? (Dimmer switch up and switches in workshop turned to red).

PROBLEM	The LEDs aren't turning on.
SOLUTION	<ul style="list-style-type: none">• The LEDs may be plugged into the wall in the left wing. Turn the plug on then run through a few cues with the LEDs in if they start flashing.

PROBLEM	No sound from QLab.
SOLUTION	<ul style="list-style-type: none">• Double check that all the amps are turned on.• Double check that the L and R faders are turned up as well as the master.• Try a different cue that you know works to check that the cue isn't just too quiet to hear. If so, increase the levels in Q Lab.
